

Dear Mr. Yıdıray Gançer,
Chairman of TSÜAB

I have the honor to inform you that “**1st International and 5th National Seed Science and Technology Conference of Iran (INSSTCI)**” organized by collaboration of Seed Science Society of Iran (SSSI), will be held online Feb. 9-10, 2022 at Razi University of Kermanshah, in Kermanshah City at the west part of Iran. In this conference many topics in the field of seed science and technology will be covered by the highly prominent speakers from the policy makers, academia, research and private sectors. Alongside the conference, an exhibition will be held to present the latest achievements in the field of seed industry, including newly released varieties and seed processing knowledge.

Considering the great relationships existing between the two countries, particularly among the seed industries and the extended activities of Turkish seed companies in the Iranian seed market, participating in the lateral exhibition of the conference will be a great opportunity to further strengthen the relation between seed sectors of both countries. Therefore, on behalf of the Iranian Seed Science Society of Iran and the executive board of the conference, I would like to invite Turkish seed companies to take part in this important biennial event. It would also be appreciated if you convey my invitation to the Turkish seed companies appropriately.

Best regards

Dr. Aidin Hamidi (Associate professor)
Secretary General
Seed Science Society of Iran (SSSI)
